Profile

Creative Java Developer with proven communication skills. Developing features from business requirements sharpened my ability to collaborate with project managers. I successfully apply my unique blend of technical knowledge and business vision to lead each challenge.

Experience

Application Developer, Tribune Media Services, Chicago, IL — 2006-

Develop innovative web applications and services used by our customers, affiliates and business partners. Create XML- and JSON-based web services that can be plugged in to any affiliate's site.

Project Manager, Clandestine Web, Chicago, IL — 2007-

Responsible for the coordination and completion of all web design projects. Manage design and coding timeframe within specified budget. Set deadlines, assign tasks, and report the progress to the clients.

Software Engineer, Peapod Inc., Skokie, IL — 2001-2006

Designed and delivered dynamic Java-based web features according to technical requirements in a team-oriented environment. Lead routine code refactoring sprints to maximize the lifetime of the web application.

Application Developer, Vibes Media, Evanston, IL — 2000-2001

Developed enhancements to increase revenue and customer usability of the ASP-driving web site. Increased scalability of mission-critical database by redesigning the table schemas and optimizing queries.

Education

Northwestern University, Evanston, IL — Computer Engineering, 2001
